QUICK FACTS

Plant Type: Small tree or large shrub

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: Typically 15–20 ft tall × 8–15 ft wide. Compact, semi-dwarf, somewhat weeping when fruiting

Sun

Water

Soil
Well-drained soils; tolerates sandy, rocky, alkaline (pH up to 8.5)

Zone 8a
Listed for USDA Zones 8–11. Cold-hardy among olives (tolerates brief exposure to ~12–15°F / -11°C). Zone 8a is marginal (winter lows 10–15°F); young trees need frost protection; mature trees better. Georgia/Atlanta use is possible with microclimate and protection but not ideal long-term without care.
Explicit performance notes: Marginal in 8a

PLANTING NOTES

Establishment
Self-fertile. Prune in late winter. Excellent for containers, specimens, hedges. Water more when establishing or in extreme heat

ORIGIN AND CHARACTERISTICS

Origin
Spanish cultivar originating near Arbeca, Spain (17th century). Not native to US

Form
Evergreen small tree or large shrub with narrow silvery gray-green leaves (silver underside). Creamy-white fragrant spring flowers followed by small dark olives. Bark becomes gnarled with age. Prized for high-quality aromatic oil and table olives. Early bearing. One of the more cold-hardy commercial olives
