Sun

Water

Soil
Medium moisture, well-drained, rich/humusy soil.
Tolerates dry soil once established

Zone 8a
Hardy in USDA Zones 10–11. Grown as an annual or container plant in Atlanta Zone 8a; can be overwintered indoors or treated as tender perennial. Performs well in part shade

ORIGIN AND CHARACTERISTICS

Origin
Native to rocky areas and rainforest margins along the Queensland–New South Wales border, Australia. Frequently near waterfalls

Form
Evergreen or semi-evergreen sub-shrub with densely hairy, silvery stems and gray-green, ovate, scalloped/crenate leaves (to 4–11 cm) covered in silvery pubescence. Small tubular bluish-white flowers in terminal racemes in summer. Attractive primarily for silvery foliage. Grown mainly for silvery-gray foliage rather than flowers. Spreading habit. Related to other ornamental Plectranthus/Coleus. Silvery hairs give distinctive appearance

Bark
Not stated

PLANTING NOTES

Establishment

Plant in part shade with well-drained soil. Water moderately; allow some drying. Easy from cuttings or seed (as half-hardy annual). Good for borders, containers, or mass plantings for foliage effect. Prune to shape as needed

HEALTH

Health

Watch for mealybugs, scale, mites. Root rot or leaf spot possible in poor drainage. No serious problems stated under good culture. RHS Award of Garden Merit

Symptoms

None stated
