QUICK FACTS

Plant Type: Herbaceous perennial succulent

Evergreen or deciduous
Well suited to Atlanta Zone 8a. Extremely heat and drought tolerant. Dramatic dark foliage provides contrast. Reliable late-summer bloom. Excellent for borders, mass plantings, and pollinator gardens. Low maintenance; leave seed heads for winter interest

Growth & Size
Rate: Not stated
Size: 1.75–2.5 ft (50–75 cm) tall; 2–2.5 ft (60–75 cm) wide. Upright mounding habit

Sun

Water

Soil
Average, well-drained soils. Prefers lean to moderate fertility. Avoid rich soils (causes flopping) and poor drainage

Zone 8a
Well suited to Atlanta Zone 8a. Extremely heat and drought tolerant. Dramatic dark foliage provides contrast. Reliable late-summer bloom. Excellent for borders, mass plantings, and pollinator gardens. Low maintenance; leave seed heads for winter interest

ORIGIN AND CHARACTERISTICS

Origin
Hybrid selection (Rock 'N Grow series)

Form
Upright, rounded, clumping perennial with sturdy stems

Foliage
Nearly black to dark purple, succulent, rounded leaves with blunt teeth. Dramatic dark foliage all season

Flowers and fruit
Dense terminal clusters of small flowers with creamy white petals and dark red/garnet centers. Late summer to early fall (August–September). Attracts butterflies and bees.
Good cut and dried

Bark
Not stated

PLANTING NOTES

Planting
None stated

HEALTH

Health
Generally pest-free. Deer resistant. Watch for slugs/snails on young plants. No serious problems stated when sited with good drainage

Symptoms
None stated
