Plant Type: Shrub

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: - 3–5 ft tall × 2–4 ft wide.
- Compact form of the species (US

Sun

Water

Soil
Prefers moist, acidic, organic soil

Zone 8a
Suitable for Atlanta Zone 8a. Compact cultivar of a southeastern native species. Hardy Zones 6–10. Prefers moist, acidic soil and part shade. Heat and humidity tolerant. Not stated for specific Atlanta urban performance beyond general hardiness and compact habit

PLANTING NOTES

Establishment
- Plant in moist, acidic soil in part shade. Compact habit requires less pruning than the species (USPP13347P2)

ORIGIN AND CHARACTERISTICS

Origin
- Cultivar of Agarista populifolia, which is native to the southeastern United States (FL, GA, SC, AL). - Discovered as an open-pollinated seedling at Taylor's Nursery, Semmes, AL (USPP13347P2)

Form
- Compact evergreen shrub. Upright, spreading branching. Smaller and more compact than the species

Foliage
- Glossy, dark green foliage. Smaller and narrower leaves than the species. Reddish-bronze undulate immature foliage.
- Evergreen

Flowers and fruit
- Fragrant white bell-shaped flowers in clusters in spring

Bark
- Not stated

HEALTH

Health
- High severity poison characteristics for the species. Foliage poisonous. - Heat and humidity tolerant (Plant Lust)

Symptoms
None stated
