Plant Type: Shrub

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: 2–3 ft (0.6–0.9 m) high × 3–4 ft (0.9–1.2 m) wide.
Compact mounded

Sun

Water

Soil
Average, medium, well-drained soils.
Tolerates a wide range of soils including clay

Zone 8a
Hardy in USDA Zones 4–8. Excellent for Atlanta Zone 8a. Compact shrub with carmine-red to deep pink flower clusters in late spring to summer. New foliage reddish-purple, maturing to blue-green, with burgundy fall color. Heat and humidity tolerant. Attracts butterflies. One of the most reliable summer-blooming spireas

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Spiraea × bumalda (hybrid of S. albiflora and S. japonica). Long-established and widely grown. Selected for its compact habit and carmine-red flowers.
One of the classic summer-blooming spireas

Form
Compact mounded deciduous shrub. Oval sharply toothed leaves emerge reddish-purple in spring, mature to blue-green, and turn burgundy in fall. Flat-topped clusters of carmine-red to deep pink flowers in late spring to mid-summer. Attracts butterflies. Neat habit. Classic compact spirea. Carmine-red summer flowers. Colorful new growth and fall foliage. Extremely reliable and heat tolerant. Attracts butterflies. Excellent for Atlanta. One of the most widely planted spireas
