QUICK FACTS

Plant Type: Shrub

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: Dwarf; 20 inches (50 cm) tall and wide after 10 years; mature estimates 2–5 ft high and wide. ~2 inches (5 cm) per year.
Compact rounded/globose habit

Sun

Water

Soil
Well-drained soils of any type (chalk, clay, loam, sand); average to dry moisture. Prefers acidic but tolerates neutral to alkaline

Zone 8a
Hardy in USDA Zones 3–8. Suitable for Atlanta Zone 8a

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Pinus strobus (eastern white pine), native to eastern North America. Originated as a witch's broom found in 1997 on Pinus strobus 'Contorta' (or 'Torulosa') at Bickelhaupt Arboretum, Clinton, Iowa, by Dave Horst.
Also known as 'Green Curls' in some references

Form
Evergreen conifer shrub with dense, tight branching and fluffy, twisted/curly green to blue-green needles. Globose or rounded form. No significant fall color change (evergreen). Bark not specially noted beyond typical pine. One of the smaller dwarf twisted-needle white pines. Distinctive shaggy, poodle-like texture from the twisted needles. Suitable for collectors and architectural interest in limited spaces

Foliage
Not stated

Flowers and fruit
Not stated

Bark
Not stated

PLANTING NOTES

Establishment

Plant in full sun with good drainage. Slow-growing and compact—ideal for rock gardens, containers, borders, or small spaces. Propagate by grafting. Pinch candles in spring if denser form is desired. Comb out dead needles occasionally

HEALTH

Health

No serious problems stated. Easy to grow, hardy, low-maintenance. Generally resistant to common issues of the species

Symptoms

None stated
