Evergreen

Growth & Size
Rate: Not stated
Size: 4–6 ft (1.2–1.8 m) high × 4–6 ft (1.2–1.8 m) wide.
Mounding habit

Sun

Water

Soil
Organic mulch recommended

Zone 8a
Hardy in USDA Zones 7b–10b. Excellent for Atlanta Zone 8a and the Gulf South. Classic Southern Indica with large fragrant lavender/light purple spring blooms and reddish freckles. Dense spring display. Heat and humidity tolerant.
Old favorite now less common

ORIGIN AND CHARACTERISTICS

Origin
Branch sport discovered and propagated by Kosaku Sawada (famous camellia breeder) in the early 1900s. Named after the Gulf region of Alabama where he resided. Southern Indica hybrid group, popular in the Gulf South for massive spring blooms

Form
Evergreen Southern Indica azalea. Large single flowers (3–3.5 in) lavender to soft purple with reddish freckles on upper petal. Fragrant. Mounding form. Dark green foliage. Spring bloom only (2–3 weeks). Attracts pollinators. Old Southern Indica favorite with large fragrant lavender flowers. Sawada introduction. Now rare in trade. Strong spring show. Heat-tolerant for the Gulf South. Fragrant blooms best enjoyed near patios or walkways

PLANTING NOTES

Establishment

Plant in full sun to partial shade with acidic, well-drained soil. Mulch with organic matter. Prune right after spring flowering if size control is needed. Excellent for specimens, groupings, or fragrant hedges near outdoor living spaces. Classic southern landscape staple

HEALTH

Health

Generally trouble-free when planted correctly in acidic, well-drained conditions. Typical azalea cultural requirements. Attracts pollinators. No serious problems stated as dominant for this selection

Symptoms

None stated
