Hardy USDA Zones 3–9. Fully suitable for Atlanta Zone 8a. Excellent drought tolerance once established. Performs well in full sun for best fall color. No special winter protection needed

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Rhus aromatica, native to eastern and central North America (including parts of the Southeast)

Form
Dense, low-growing, rambling, spreading shrub.
Used as bank cover and groundcover

Foliage
Trifoliate (3 leaflets), medium to glossy green, aromatic when crushed. Brilliant orange-red to purple fall color.
Non- poisonous (unlike poison ivy)

Flowers and fruit
Insignificant yellow flowers in spring before leaves. Female plants produce small clusters of hairy red berries in late summer that persist into winter; attract wildlife

Bark
Not stated

HEALTH

Health
Generally pest- and disease-free.
No serious problems stated. Tolerant of rabbits. Non-poisonous

Symptoms
None stated
