QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Hardy in USDA Zones 6–10 (some listings 5a–8b). Low-chill selection (~350 chill hours) well suited to Atlanta Zone 8a and the Southeast. Excellent for containers, patio, or landscape edging. Reliable fruit production and ornamental foliage in heat and humidity

Growth & Size
Rate: Not stated
Size: Compact, 2–5 ft tall and wide (commercial listings). Patent describes young plant ~45 cm tall × 60 cm wide. Moderate to rapid growth. Dense, boxwood-like habit

Sun

Water

Soil
Prefers acidic, well-drained soils with high organic matter (pH 4.5–5.5 ideal). Tolerates heat well

Zone 8a
Hardy in USDA Zones 6–10 (some listings 5a–8b). Low-chill selection (~350 chill hours) well suited to Atlanta Zone 8a and the Southeast. Excellent for containers, patio, or landscape edging. Reliable fruit production and ornamental foliage in heat and humidity

ORIGIN AND CHARACTERISTICS

Origin
Interspecific hybrid (Vaccinium myrsinites × V. corymbosum). Discovered as a chance seedling in a nursery in Hawthorne, Florida. Patented as PP22,521 (issued 2012). Garden origin

Form
Compact, semi-upright to mounding ornamental blueberry. Small glossy dark green leaves resembling boxwood; new growth red in spring; fall color purple-red, red, yellow, or burgundy. White bell-shaped flowers in spring. Sweet dark blueberries in early summer. Unique ornamental edible with boxwood-like foliage, spring flowers, and early summer berries. Low-chill hybrid excellent for warm climates. Patent PP22,521. More drought resistant than typical highbush blueberries

PLANTING NOTES

Establishment
Plant in full sun on acidic, well-drained soil. Ideal for containers or small garden spaces. Low-chill and heat tolerant. Self-fruitful but better yield with multiple plants. Moderate maintenance; prune lightly if needed for shape

HEALTH

Health
Resistant to most normal Vaccinium foliar diseases. Generally healthy and more disease resistant than many blueberries. Some drought tolerance

Symptoms
None stated
