Attracts butterflies

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of Spiraea cantoniensis, native to China. 'Lanceata' (or 'Flore Pleno') is the double-flowered form most commonly cultivated in North America. The single-flowered species is rarely grown. Long cultivated in Asia

Form
Deciduous to semi-evergreen shrub with graceful arching branches. Dark green lozenge-shaped leaves. Dense hemispheric clusters of double white flowers in spring along the stems. Fountain-like habit. Attracts butterflies. Yellow fall color in some conditions. Classic double-flowered Reeves spirea. Arching branches covered in double white flower clusters in spring. Excellent for Atlanta. Heat tolerant. Semi-evergreen in the South. Attracts butterflies. Widely grown ornamental
