QUICK FACTS & PLANTING

Type: Tree
Evergreen/Deciduous: Evergreen
Mature size: 30–60 ft (up to 80+ ft). Confirmed by LSU Horticulture (25 ft average noted but larger), TreeHelp (36–60 ft), FNA (to 30 m). × 20–40 ft. Confirmed.
Hardiness / Zone 8a: Suitable for Zone 8a. Hardy Zones 7–9. Native to southeastern coastal plain including Georgia. More shade tolerant than most pines. Dense canopy. Prefers moist fertile soils but adaptable. Smooth upper bark. Good for screens or shade. Performs in Atlanta on well-drained to moist sites.
Sun: Full sun to partial shade. More shade tolerant than most yellow pines.
Water: Medium. Prefers moist soils. Moderate drought tolerance.
Soil: Sandy alluvium, mesic woodland. Prefers fertile, moist, acidic. Adaptable.
Growth rate: Not stated
Not stated
Planting:
Siting: Plant in full sun to part shade in moist, well-drained soil. Water until established. Suitable for shade, screen, or naturalized planting. Dense canopy. Minimal pruning. Good for Atlanta sites with some moisture.
Soil prep: Sandy alluvium, mesic woodland. Prefers fertile, moist, acidic. Adaptable.
Depth/spacing: Not stated
Season: Not stated
Establishment: Not stated

ORIGIN, CHARACTERISTICS & HEALTH

Origin / native: Sandy alluvium and mesic woodland. Coastal plain.
Form / habit: Evergreen conifer. Medium tree. Conic to rounded crown. Dense. Irregular with age. Moderate growth.
Foliage: Evergreen. No fall color.
Flowers / fruit: Not stated
Bark / stem: Gray, fissured into scaly plates lower; upper trunk smoother, gray, slick appearance.
Not stated
Health:
Health notes: Few major disease problems. Possible pine pests (adelgids, bark beetles, etc.). Occasional cankers. **Open:** Specific Zone 8a incidence thin.
Not stated
Additional:
- 2 needles per fascicle, shorter than many southern pines. - More shade tolerant. - Smooth upper bark distinctive. - Dense shade. - Native to Georgia coastal plain.
