QUICK FACTS

Plant Type: Deciduous woody vine

Evergreen or deciduous
Deciduous

Growth & Size
Rate: Not stated
Size: 25–30 ft (7.5–9 m) tall when supported; 10–15 ft (3–4.5 m) wide. Less aggressive than Asian wisterias

Sun

Water

Soil
Full sun to partial shade. Slightly acidic, humusy, moderately fertile, moist, well-drained soils. Best flowering in full sun

Zone 8a
Excellent for Atlanta Zone 8a. Heat tolerant. Outstanding native alternative to invasive Asian wisterias. Fragrant spring blooms. Less aggressive. Ideal for trellises, arbors, and structures. Deer tolerant. Medium maintenance (pruning for form)

ORIGIN AND CHARACTERISTICS

Origin
Cultivar of a species native to the southeastern United States (stream banks and forests)

Form
Deciduous twining climber. Can be trained on structures or grown as a large shrub. Not as vigorous a spreader as W. sinensis or W. floribunda

Foliage
Compound, odd-pinnate leaves with 9–15 lance-shaped leaflets. Deep green

Flowers and fruit
Fragrant, pea-like, lavender-purple flowers in drooping racemes 4–6 in long. April–May (after leaves emerge but before fully developed). Limited additional summer bloom possible. Attracts bees and birds; Narrow, flattened, smooth seed pods to 5 in long. Ripen in summer; split open in fall. Harmful if eaten

Bark
Not stated

PLANTING NOTES

Planting
None stated

HEALTH

Health
Generally pest- and disease-free. Deer tolerant. No serious problems stated. Seeds and pods harmful if ingested

Symptoms
None stated
