QUICK FACTS

Plant Type: Not stated

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: 6–12 in. tall × 6–12 in. or more wide; forms dense clumps/ground cover

Sun

Water

Soil
Part shade to full shade (tolerates some sun). Moist but well-drained, rich, humusy, slightly acidic soils. Consistent moisture preferred; drought-tolerant once established

Zone 8a
Hardiness Zones 6–10 / 7–10. Evergreen in warm winter climates including Atlanta Zone 8a. Widely used as ground cover in SE landscapes. Explicit Atlanta performance: Suitable and commonly grown; foliage remains evergreen

PLANTING NOTES

Establishment
Excellent ground cover for shady areas, borders, underplanting. Spreads slowly via stolons. Propagate by division.
Salt tolerant

ORIGIN AND CHARACTERISTICS

Origin
Native to Japan, China, Korea (East Asia woodland).
Not native to US

Form
Evergreen rhizomatous perennial forming arching clumps of narrow, linear, dark green grass-like leaves. Small white to lilac bell-shaped flowers in summer followed by blue-black berries. No significant fall color (evergreen). Traditional Japanese garden plant. Dense foliage suppresses weeds. Can be invasive in ideal moist conditions if not managed

Foliage
Not stated

Flowers and fruit
Not stated

Bark
Not stated

HEALTH

Health
Low maintenance. Possible slugs, snails, or root rot in overly wet conditions. Generally no serious problems stated.
Deer resistant

Symptoms
None stated
