QUICK FACTS

Plant Type: Palm

Evergreen or deciduous
Evergreen

Growth & Size
Rate: Not stated
Size: 3–4 ft tall (occasionally to 6 ft in cultivation), 4–5 ft wide.
Small,by palm with usually subterranean trunk

Sun

Water

Soil
Well-drained sandy soils preferred; adaptable

Zone 8a
Suitable for Atlanta Zone 8a (hardy to Zone 8). Prefers full sun and excellent drainage. Drought tolerant. Subterranean trunk helps with cold. May need winter protection or mulch in colder microclimates. Good for sandy or well-drained sites.
Distinct from Sabal palmetto

PLANTING NOTES

Planting
None stated

ORIGIN AND CHARACTERISTICS

Origin
Endemic to Florida (central and southeastern sand pine scrub habitats). Not native to Georgia but cultivable

Form
Evergreen palm with subterranean (or rarely short) trunk and crown of costapalmate leaves. Compact, bushy

Foliage
Strongly costapalmate, yellow-green fan leaves (to 3 ft across) with 25–50 narrow, rigid segments, fibers between segments, bifid tips. Curved by costa. org, Palmpedia

Flowers and fruit
Fragrant white flowers in spring–summer on compact inflorescences about as long as leaves.
Followed by fleshy blackish drupes (~0.5 in)

Bark
Not stated

HEALTH

Health
Basically disease- and pest-free once established.
Low maintenance

Symptoms
None stated
